

Tristan Anglin

35 Greatwood Cres, Ottawa, ON K2G6T6

613-986-5142 | tmanglin00@gmail.com

Portfolio: tristananglin.github.io

Summary

- **System-First Development:** Game developer specializing in bridging the gap between artistic vision and technical execution within Unreal Engine (UMG & Blueprints), C++, and C#. Focused on breaking down complex development problems into clean, optimized, and modular solutions that allow both players and development teams to succeed.

Technical Skills

- **Programming Languages:** Proficient in C++, C#, JavaScript, TypeScript, Python, and Java.
- **Engines & Frameworks:** Advanced development experience in Unreal Engine (UMG & Blueprints), Unity, and custom OpenGL pipelines.
- **Systems & Architecture:** Experienced in architecting server-sided logic, networked 4-player co-op logic, and UI systems.
- **Tools & Workflows:** Repository management and build stability via GitHub. Agile sprint task tracking using Jira for 11-person team environments.

Relevant Education

Algonquin College | Ottawa, ON — *Advanced Diploma in Game Development*

Sept 2023 – April 2026

- **Awards:** Honours Graduate with a cumulative **3.86 GPA** and consistent Dean's List Honor Roll standing.

Relevant Experience

Algonquin College, Ottawa, ON — **Lead UI & Systems Developer | *Blood & Lineage***

Sept 2025 – April 2026

- **Architected** and implemented the entire game user interface using Unreal Engine's UMG framework and optimized Blueprint logic, managing complex real-time data syncs for a high-action 4-player cooperative environment with minimal performance overhead.
- **Elevated** player immersion and feedback loops by creating fluid UI motion design, custom viewport layout transitions, and reactive animations to ensure a highly polished experience from main menus to active gameplay.
- **Architected** server-sided networking logic to securely handle session hosting, client connections, and multiplayer state replication.
- **Directed** the technical roadmap, version control strategies, and build stability using GitHub and Jira to coordinate seamless systems integration across a multidisciplinary team of 11 developers.

Engine & Systems Developer | *Custom 2D OpenGL Engine* | Dec 2024 – Dec 2024

- **Developed** a lightweight 2D rendering engine from the ground up utilizing Modern C++ and OpenGL, achieving optimized low-level hardware abstraction and efficient heap memory allocations.
- **Architected** A* pathfinding and a grid placement system that validates player gold and checks if a structure blocks the final goal, instantly forcing enemies to recalculate their route or rejecting the placement if it completely walls them off.
- **Engineered** a camera system with a custom Top-Down Depth Sorting (Y-sorting) algorithm, minimizing draw calls while guaranteeing pixel-perfect visual layering during high-ratio zooming.

Peer Tutor & Program Assistant | Algonquin College, Ottawa, ON | 2024 – Present

- **Mentored** developers in detecting and avoiding logical errors in complex C++ and C# scripts, emphasizing memory safety and performance.
- **Conducted** rigorous peer code reviews to ensure excellence in logic, maintainability, and adherence to industry standards.
- **Translated** complex programming concepts and systems architecture principles into clear, actionable technical guidance for peers.

Technical Volunteer | *Girls Who Game* — Dell Technologies | 2024 – Present

- Evaluated student coding projects and provided constructive feedback to foster STEM growth.
- Streamed virtual Esports tournaments, managing live technical execution and troubleshooting in the streaming app space.

Academic References

Konstantin Titov | Coordinator/Professor, Game Development Program 613 727 4723 Ext 2412 Algonquin College | 1385 Woodroffe Avenue | Ottawa | Ontario | K2G 1V8 | Canada

- Konstantin has overseen my development since 2023, observing my progress from an entry-level student to a technical leader. He can speak to my 3.86 GPA and my performance as a Peer Tutor and Program Assistant, where I provide technical mentorship to my peers.

Dushan Horvat | 3rd year Coordinator/ Professor, Algonquin College | 1385 Woodroffe Avenue | Room J315B | Ottawa | Ontario | K2G 1V8 | Canada

- Dushan has been a key mentor during my final year, providing critical guidance on game scope and project management. His oversight was instrumental in helping me navigate the complexities of full-cycle development, ensuring my projects remained both ambitious and achievable.

Work Reference

Ryan McDonald

Former Supervisor | RONA | 613-406-2125 | RyanMcDonald@gmail.com

- Ryan was my direct supervisor during my time at RONA, where I developed my skills in team collaboration and client-facing communication.
